

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 5, 2010

Water Body Under Evaluation:

Water Body ID #: 0352
Name: Little Platte River (Class C)
Length of Segment: 24.3 miles
County (ies): Clinton

Use Attainability Analysis (UAA) Study:

UAA ID #: 0930
Submitter: SES, Inc.
Date(s) Conducted: September 23-24, 2008
Date Received: October 14, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
☐ 3-Non-Remedial, Human Caused Condition.
☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown

Comments: The UAA survey was conducted in September 2008 and no WBCR was observed. There were interviews in 2005 noting WBCR and SCR. The presence of Conservation Land, city parks, playgrounds, boat ramps and public hunting grounds also suggest that SCR is present. 2005 comments from the Missouri Department of Conservation state that WBCR has been observed since 1975. No interviews were conducted during this survey and no comments were received in 2008.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The maximum depth criteria was met at 8 of 15 locations and median depth was met at 3 of 15 locations. With the documented evidence of WBCR and SCR (parks, playgrounds, boat ramps and hunting) use the committee recommends that WBCR and SCR be retained.

Committee Recommendation: ☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
